The most ancient of Greek Goddesses, Eurynome rose naked from the primordial chaos and instantly began to dance. Her dance separated light from darkness and sea from sky and brought forth nourishing ecstasy and joy. Following the map of the Roth 5 Rhythms it is very clear that the 3rd Roth Rhythm, Chaos has fully arrived. It is not the easiest of times for many; relationships we thought would last forever have busted apart, situations that seemed to be one way change without a moment's notice, and what we once thought secure is no longer. Life is moving faster and faster as we plug ourselves deeper into the machine. Chaos uncovers the hidden and provides rebirths of new possibilities.

We communicate, unplug and bring ceremony with the ancient ways of the Goddess Eurynome. Dance is a way to separate the machine from us and return to the ancient heartbeat of our feet. Movement is a way to clear out the blocked energy and create wide-open spaces to be filled with health, ecstasy, joy and creation. The maps of the Roth 5 Rhythms, shamanic journeys, medicine animals and the spirit of Eurynome guide us through this Goddess journey
